TERMS AND CONDITIONS:

1. Application and Approval

- The applicant must submit a completed "Application for New Water Service Connection" form along with proof of ownership or authorization from the property owner.
- The applicant should include a site map or plans that contain the following information:
 - **Property Boundaries:** Clearly defined property.
 - **Existing Structures:** Location of existing structures and driveways that might affect the installation.
 - **Proposed Meter Location:** The exact proposed location for the new water meter including pipe size.
 - **Utilities:** Location of existing utility lines.
 - **Easements:** Identification of any easements on the property.
- The application will be reviewed by CWD staff. Notification of approval or required modifications will be provided within 30 days of submission.

2. Systems Development Fee

- The applicant must pay a system development fee to the District, which varies based on the connection size. This fee is due at the time of application for a new water service connection and must be paid in full before installation can begin.

(Continued on back)

¹ For additional meter sizes, please inquire with office

3. Installation Costs

- **Standard Installation:** The applicant is responsible for all costs incurred by the District for the installation of metered connection at the property boundary, provided this boundary is not more than 100 feet from the existing water main.
- **Payment Deadline:** The total costs of meter installation, materials, and District overhead must be paid within thirty (30) days of the completion of the metered installation.

4. Additional Costs

- **Crossing Public Roads:** The applicant must pay any additional costs incurred by the District for constructing any service connection that crosses a public road or highway.
- **Private Contractor:** If installation requires crossing a paved road or highway, the applicant may need to hire a private contractor to perform this work.

5. Easements

- **Easement Execution:** The applicant must execute any necessary easements requested by the District for the construction and maintenance of the water pipeline on their property.

6. Water Usage

- **Service Commencement:** Applicant will need to submit an "Application for Water Service" and pay related fees before receiving water from the District.
- **Usage Restrictions:** If water availability is limited, the District may restrict water usage for non-domestic purposes.

7. Permits and Approvals:

- **Permits:** The applicant is responsible for obtaining any necessary permits or approvals required by local, state, or federal authorities for the water service connection.
- **Compliance:** All installations must comply with applicable building codes and environmental regulations.

8. Backflow Prevention:

- **Device Installation:** The applicant must install an approved backflow prevention device, if required by the District. This device must be tested annually by a certified tester, and results must be submitted to the District.
- **Maintenance:** The applicant is responsible for maintaining the backflow prevention device to ensure it functions properly.

9. Construction Standards:

- **District Standards:** All work related to the water service connection must meet the District's construction standards and specifications.
- **Inspections:** The District reserves the right to inspect the installation at any time to ensure compliance with these standards.

10. Insurance:

- **Liability Insurance:** If the applicant hires a private contractor, the contractor must carry appropriate liability insurance. Proof of insurance may be required by the District.

ACKNOWLEDGMENT

By signing below, I confirm that I have read, understood, and agree to comply with all applicable terms, conditions, and regulations established by the Colton Water District.
